Nationality: Pakistan DOB: 31/07/1994 Notice Period: 1-Month

A highly focused, energetic, an ambitious web application developer who has developed a mature, I innovative and responsible approach to any task that undertake. With around 6 years of strong development experience in User Interface web applications and integration of highly transactional and scalable applications using Object Oriented Programming and design Patterns. Extensive experience in developing Web Interface using HTML5, CSS3 and good frameworks & libraries of JavaScript. Responding to challenges by designing and developing solutions. Having good understanding of Object-Oriented Design, and sense of design. Efficiency, optimization, and accuracy are always top of mind and willing to boost my skills by learning new technologies like Artificial Intelligence, Design Patterns and MVC. Committed to finding innovative solutions to a variety of IT Problems having hands on experience AWS Services. And continuously Amazon Web Services, React.js, Vue.js, Kubernetes etc.

- React JS, Vue Js
- Redux, Jest
- TypeScript, JavaScript
- JQuery
- Next Js
- Tailwind, Material Ui, Ant Design
- HTML5, CSS3, Bootstrap
- Less, Sass
- UI / UX Design, Photoshop
- Data Modeling
- Axios, Ajax, Fetch

• NodeJs, Express, NestJs • Python (Flask) •
Dynamo Db, MySql, MongoDB • AWS, EC2, Linux,
Microservices • PHP (CodeIgniter, Laravel,
Wordpress, Drupal) • Scrum, Agile, Jira • Product
Testing (Unit Test, Selenium) • Github, GitLab •
CICD • Problem Solving

Full Stack Developer Stag Digit

Feb 2022 to Present

UK

Government Administration, Leading Pakistan economic agenda to create a balanced, diversified, sustainable and knowledge-based economy.

- Orchestrated (micro-)service workflows using Camunda Modeler and Camunda Cockpit, serving as a remote REST service within our systems.
- Created BPMN process diagrams and deployed workflows to Camunda Engines, ensuring seamless execution.
- Developed backend (micro-)services using Express and NodeJS, actively contributing to
- core packages and tools.

 Ensured service quality by identifying root causes of defects, bugs, and VAPT issues,
- implementing best coding practices resolutions.

 Utilized Git for version control, collaborating with developers through repositories, branches,
- commits, Pull/Push, and Merge Requests. Maintained code coverage of 80% for Frontend and 90% for Backend using Jest and Enzyme.

Front End Developer

Softlink Pakistan,

Softlink is a venture consulting, strategic communications and investment group that combines management consulting, design thinking, technology and investments.

- Building repsonsive interfaces and user experience using ReactJs, Typescript and internal UI libraries while maintaining compatibility and responsiveness for all major browsers.
- Handling (micro-)service orchestration and logic with the help of Camunda Modeler and Camunda Cockpit (source of truth) used as a remote REST service embedded in our services.
- Developing backend (micro-)services using Express and NodeJS as well as contributing to backend core packages and tools.
- Maintaining code coverage of 80% for Frontend & 90% for Backend code using Jest and Enzyme.
- Developing the reusable components using styled Components for Mono-repo architecture.
- Regularly using Git for service version control and collaboration between all developers using repositories, branches, commits, Pull, Push and Merge Requests.
- Worked on SOLR for search & G42 Cloud.
- Using next JS for the server rendering apps.
- Very proficient knowledge of JIRA to track issues and communicate with other team members.

Front End Developer Mdeux

Jun 2017 to Aug 2019 Islamabad,

Pakistan

Mdeux is service providing organization with experience in building high end web applications for customers all over the world.

- Created class based and function-based components, added necessary event listeners,
 - implemented communication strategies between React Components.
- Implemented Web Animations, Animated Transitions smoothly from one CSS style to another style using JavaScript and CSS3.
- Identified web-based user interactions and developed highly responsive desktop, tablet and mobile Friendly Interfaces via Bootstrap and Css3 flex system.
- W3C standards coding, Pixel Perfect, Optimized for Load Speed, SEO Semantic Coding.
- Liaised with content writers and designers to bring their creativity to digital reality and ensured to concerned to meet project.
- Produced high-quality mockups, designed different prototypes and provided high quality graphics and visual elements.
